Di Chun Spirit — Our Heart is to be Tolerant of Diversity.

CONTENTS

A STRONGHOLD BY PRECISION AND POWER.

P15 Scroll / Chuck Jaw Chuck

KD
3-jaw strong scroll chuck
D1 camlock direct mounting,
2-piece jaws.

N-200A
3-jaw through-hole power chuck.
(adapter included)

V
3-jaw wedge type non
through-hole power chuck.
(adapter excluded)

VRA
Non through-hole power chuck for
vertical lathe (adapter included).

M
High speed through-hole
rotary hydraulic cylinder.

MS
Non through-hole rotary hydraulic
cylinder.(valve included)

SC
3-jaw scroll chuck plain
back, solid jaws.

KA
3-jaw strong scroll chuck
A1 direct mounting, 2-piece
jaws.

NT-200
2-jaw through-hole power chuck.
(adapter excluded)

VT&VIT
2-jaw and 4-jaw wedge type non
through-hole power chuck.
(adapter excluded)

P37 Collet Chuck

MK
Super high speed through-hole
compact rotary hydraulic cylinder.

MS-C
Non through-hole rotary hydraulic
cylinder. (valve and switch brackets
included)

SIC
4-jaw scroll chuck plain
back, solid jaws.

SE
6-jaw scroll chuck plain back.

NIT-200
4-jaw through-hole power chuck.
(adapter excluded)

VA
3-jaw wedge type non
through-hole power chuck.
(adapter included)

CR
Collet chuck for cylindrical center
mount.

CM.B
Hydraulic cylinder coolant collector.

MS250C/MS300C
Non through-hole rotary hydraulic
cylinder. (valve and switch brackets
included)

SK
3-jaw strong scroll chuck
plain back, 2-piece jaws.

P22 Power Chuck

NHT-200
2 jaw and 3 jaw through-hole
power chuck. (adapter included)

V(40"-79")
Large wedge type non
through-hole power chuck.
(adapter excluded)

CRA
Collet chuck for short taper mount.

ML-CM.B
Extra large through-hole rotary
hydraulic cylinder.

MR
Short Type Non Through Hole
Rotary Hydraulic

SIK
4-jaw strong scroll chuck
plain back, 2-piece jaws.

N-200
3-jaw through-hole power chuck.
(adapter excluded)

NB-200A
3-jaw extra large through-hole
power chuck. (adapter included)

DV/DN
Vertical and vertical horizontal
stationary power chuck.

P39 Hydraulic Cylinder

MM
High speed and compact
through-hole rotary hydraulic cylinder

MH
Non through-hole rotary hydraulic
cylinder.

P51

Soft & Hard Jaws

P56

ADAPTER

Mounting adapter on short taper spindle noses DIN55026.

P60

F66

High speed and light weight type strong finger chuck for aluminum wheel.

P65

PB-ES

Pneumatic power chuck.

P51

HB4

Boring mill jaw.

P57

T-UNTS

Suitable for power chuck.

P61

BL

3-jaw ball swing lock chuck.

P66

HC40-1

Soft jaw for hydraulic power chuck

P52

SKC

Soft jaw for strong scroll chuck.

**P58
Special Purpose Power Chucks**

P62

DR

3-jaw draw down power chuck.

P66

HJ40-1

Hard jaw for hydraulic power chuck

P53

HC

Soft jaw for hydraulic power chuck.

P58

F52

High speed and light weight type strong finger chuck for aluminum wheel.

P63

P165

Floating plate center chuck.

P55

HJ

Hard jaw for hydraulic power chuck.

P59

F61

High speed and light weight type strong finger chuck for aluminum wheel.

P64

HN

3-jaw extra high speed through-hole power chuck. (adapter included)

**Customer First, Employee's Need,
It is Di Chun's Core Value of Management.**

A sincere enterprise that is worthy to trust-Di Chun. Traditional spirit, innovative technology; people-oriented and treat them as family; solid our career in Taiwan and exploring the world.

Past 40 years, Di Chun insists the spirit of "Quality to be the must and customer must to be the first; do the right thing; seeking the truth and finding the cause" applied to manufacturing various kind of accurate products. We rapidly rose from small or medium-sized companies and factories, but today we are wide continuously recognized and have been honored by supplying worth-trust machine tool equipment to many users.

Di Chun expanded in 1992 and established the brand "Auto Strong" which has a meaning of being precise and strong as eagle's claw, in order to emphasize the quality and high performance of Di Chun products, this is our value to focus on research, development and innovation, solid our career in Taiwan then head to the international machine tool equipment market; meanwhile, the precise production process were compliments by our customers.

Until now, Di Chun not only insist strict quality control, but emphasize the six policies of "personal cultivating, innovation constantly, flexible thinking, uplift the career, global vision, outstanding products" symbolizes the contemplation of Di Chun "Head to the global market and Taiwan will be known everywhere."

The competition advantage is the capital for most business, but what support Di Chun to sustainable development is a team united as a strong family. We insist a concept of "tolerance diversity, placing every employee to the right position", in order to advance the ability, we create a comfortable working environment, training them to be specialist and share the profit together. There is an ancient Chinese saying: "If people's hearts together, the great mountain can be moved", Di Chun policy is based on traditional Taiwanese spirits which is serious and responsible, and completely reflected the best quality of "Made in Taiwan".

Di Chun represents the culture of "people-oriented" and participate this policy in various aspects: "Traditional spirits, based on honor, reliable quality; new concepts, understanding the trend of the world; advanced technology, research innovative, challenge beyond the limit."

Today, Di Chun persists developing product perfect than ever not only by approved by ISO & CE, but severe self-demanding, This is what we perform and doubtless we have confidence that we are going to be the top one machine tool equipment manufacturer in the future.

This is Di Chun, create miracles, worth trusting.

Innovation is recorded by time

Di Chun is proud of its achievement today, but not complacent, because every step along the way was hard, these were earned carefully.

Besides treasuring what we have now, also remind ourselves through the past experience. Challenge our limit at every moment. Let innovation be recorded by time.

- 1970**
- 1974 Established Yong Yu Machinery Factory on Zhenxing Rd. in Taichung, and manufactured 3-jaw scroll chucks professionally.
 - 1976 Quality was affirmed by the machine tool maker, and 3-jaw scroll chucks started being mass produced.
 - 1977 The group changed and established Di Chun Iron Work Co., LTD., and expanded business by relocating the factory to Yonghe St. in Taichung City. The R&D Department was established, and a range of interchangeable chuck jaws for hydraulic chucks were successfully developed.
 - 1978 Purchased CNC lathes and Machining Centers, production becomes fully automated.
- 1980**
- 1980 Cooperated with ONO Machine & Tool Co. Ltd., as a joint venture, and successfully entered into the Japanese market.
 - 1982 Researched and developed special purpose precision drilling machine and entered into the business operations.
 - 1984 The operation of the whole factory was upgraded to computerized data management.
 - 1987 Along with the government, the strategic components strategic standards were promoted and also entered into the research of jaws for CNC lathe chucks.
 - 1988 Successfully researched and developed hydraulic 3-jaw scroll chucks and super high-speed rotary hydraulic cylinders for CNC lathes in cooperation with the Mechanical and Systems Research Laboratories of Industrial Technology Research Institute.
- 1990**
- 1991 Awarded the approval of MCS (Mechanical Component Standard) certification.
 - 1992 Expanded the company's operations, and increased the capital to NT\$ 50 million, and relocated to Wu Jih Factory. Entered into the international automation equipment market.
 - 1993 Established Beijing and Shenyang offices in mainland China. Promoted total quality control. Adopted 100% Meehanite for the main body of the 3-jaw scroll chucks.
 - 1995 Passed the CE (Conformité Européenne) marking certification. The company officially changed the Chinese name to Di Chun Iron Work Co., LTD. (the English name remained the same). Products honored with Golden Tripod Award by the Air/Oil Hydraulic Society.
 - 1996 Passed the ISO-9002 Quality Assurance System certification.
 - 1997 Researched and developed the following items: M2511 high-speed rotary hydraulic cylinders (15"), MS Non through-hole rotary hydraulic cylinders with built-in safety device, MSC Non through-hole rotary hydraulic cylinders with built-in safety & detection device, and CT42 precision collet chucks.
 - 1998 Researched and developed: V218 Non through-hole hydraulic chucks.
 - 1999 Researched and developed: V244 Non through-hole hydraulic chucks.
- 2000**
- 2000 Researched and developed: finger chucks for aluminum wheels.
 - 2001 Researched and developed: MM0933 and MM1033 through-hole rotary hydraulic cylinders.
 - 2002 Researched and developed in June: HN06 ten thousand rpm hydraulic chucks and HG296 ten thousand rpm hydraulic cylinders. Passed the ISO-9001 Quality Assurance System certification in September.
 - 2003 Researched and developed: HB4 boring mill, P165 floating plate center chuck, and N204- and NB-series extra-large through-hole chucks.
 - 2004 Expanded the factory complex. Researched and developed: DR-series draw down chucks and BL-series ball swing lock chucks.
 - 2005 Researched and developed: F52 12"~18" finger chucks for aluminum wheels.
 - 2006 Researched and developed: F61 13"~22" and F66 17"~24" finger chucks for aluminum wheels.
 - 2007 Researched and developed: V240(1000mm) Non through-hole hydraulic chucks and MS250C Non through-hole rotary hydraulic cylinders.
 - 2008 Researched and developed: V250(1250mm) Non through-hole hydraulic chuck and VE263(1600mm) extra-large vertical lathe Non through-hole chucks.
 - 2009 Researched and developed: ML-2816 extra-large through-hole rotary hydraulic cylinders.
- 2010**
- 2010 Researched and developed: ML-3320 extra-large through-hole rotary hydraulic cylinders.
 - 2011 Researched and developed: VE 279(2000mm) Non through-hole hydraulic chucks and MS300C Non through-hole rotary hydraulic cylinders.
 - 2012 Researched and developed: PB-ES600-275 pneumatic power chucks and MR250 Non through-hole compact rotary hydraulic cylinders.
 - 2013 Researched and developed: PB-ES850-375 pneumatic power chucks and the factory was relocated to Precision Machinery Park to expand its operations.

A STRONGHOLD BY PRECISION AND POWER.

Precise Manufacturing Process

Chuck is the main component of the lathe; it's not only lightweight and resilient, but also stable and solid. Di Chun always insist traditional principle: "Quality Stabilized", "Energy Efficiency", "Standard specification", and fully understand the trend of the world, in order to transcend the limit of our manufacture process, which based on innovative ideas and advanced technology.

Product Advantages

- It is smaller and lighter than the regular products, and it is more stable during high speed rotation, reduce the spindle loading.
- Manufactured by aluminum alloy, it is lightweight, the machine can elaborate its features, and equipped with a safety lock mechanism.
- Parts standardization, high-speed, high clamping force, easy to assemble operation, and durable.
- Low noise, pollution-free.

Strict Quality Control

Even the precise manufacturing process still need the strict quality control, Di Chun does not only get several domestic rewards, but also approved by CE & ISO-9001 certifications. Di Chun insists its quality control through the tool of IMPACT Three Dimensional Testing and TESA Height Gauge to offer the best product to customers.

A STRONGHOLD BY PRECISION AND POWER.

“Auto Strong” Well-known Reputation over 20 Years

20 years ago, when most Taiwanese enterprises which making a decision between OEM, ODM or OBM, Di Chun already insight for developing its own brand, “AUTO STRONG” was established by creativity and innovation. Di Chun has possessed 70% domestic market and become the pioneer beyond its competitors during a decade. These achievements are created by all Di Chun members together.

Di Chun’s foundation is based on our professional team work. In 1995, Di Chun was ahead of competitors to entering the European market by CE certification and domestic award.

Di Chun, a world- class factory, a symbol of good quality and a professional developing create the reliable product worldwide such as Great Britain, United States, Germany, Italy, China, Thailand, Indonesia, Malaysia, Japan, Brazil, Soviet Union, Singapore and get good reputation from them.

Marketing construction and sales network built by professional team and become the pioneer among the realm of machine tool equipment manufacturing. Besides, Auto Strong products focus not only on high quality, but excellence.

Even global changed itself rapidly, Di Chun insist one policy, developing new product, display our highly efficiency and professional, and create our value to the top level. Auto Strong, as precise as eagle’s claw, is what Di Chun shows and captures customer’s hearts.

Di Chun, create miracles, worth trusting.

SC

3-jaw scroll chuck plain back, solid jaws (front and back mounted)

1. Interchangeable utilization of internal and external hard jaws.
2. SC types feature economical and durable, suitable for mass production.
3. Gripping accuracy of 0.03mm (0.0012 inch) T.I.R..
4. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

SIC

4-jaw scroll chuck plain back, solid jaws (front and back mounted)

1. Gripping of square or octagonal workpieces could fit into central line automatically.
2. SIC have high stability in gripping thin tube work piece.
3. The specification is the same as SC type.
4. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

SK

3-jaw strong scroll chuck plain back, 2-piece jaws (front and back mounted)

1. SK types chucks have wider utilization range; hard jaws suitable for heavy cutting; soft jaws suitable for light and precision cutting.
2. Hard jaws could be used as internal jaws and external jaws.
3. Gripping accuracy of 0.03mm (0.0012 inch) T.I.R.
4. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

SIK

4-jaw strong scroll chuck plain back, 2-piece jaws (front and back mounted)

1. Hard jaws are adopted for square or octagonal thin tube workpieces machining.
2. Soft jaws could grip rectangular workpiece after being unisotropic machined.
3. The specification is the same as SK type.
4. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

KD

3-jaw strong scroll chuck D1 camlock direct mounting, 2-piece jaws

(ASA spindle nose D1-4, D1-5, D1-6, D1-8)
American standard camlock type with 2-piece reversible hard top jaws.

1. Gripping accuracy of 0.03mm (0.0012 inch) T.I.R..
2. Standard accessories chuck wrench, hex. key. and a set of mounting bolts. (UNC-bolts)
3. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

KA

3-jaw strong scroll chuck A1 direct mounting, 2-piece jaws

(ASA spindle nose A1-5, A1-6)
American standard camlock type with 2-piece reversible hard top jaws.

1. Gripping accuracy of 0.03mm (0.0012 inch) T.I.R..
2. Standard accessories chuck wrench, hex. key. and a set of mounting bolts. (UNC-bolts)
3. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

SE

6-jaw scroll chuck plain back

1. SE types are specially meet for drilling*endmilling*tapping or grinding in tool grinders.
2. Huge bore diameter design for wider application of bar workpieces.
3. SE type feature gripping for thin tube and high roundness accuracy.
4. The body is made of MEEHANITE. It is suitably used for high speed revolution and 3 times more durable than regular material.

N-200

3-jaw through-hole power chuck (adapter excluded)

- More large bore :
- The largest bore in wedge type power operated chucks.

UNIT : mm

NHT-200

2-jaw and 3-jaw through-hole power chuck (adapter included)

1. Gripping of round or irregular workpiece does not need to change the chuck.
2. The chucks are designed according to ASA B5.9 type A spindle.
3. The chucks are made from high grade alloy steel. All sliding surfaces are hardened and ground to increase running accuracy and longer service life.

NB-200A

3-jaw extra large through-hole power chuck (adapter included)

1. More large bore:
The largest bore in wedge type power operated chucks.
2. 20% large bore:
Approximately 20% higher speed, higher gripping force and larger bore compared with regular chucks.
3. Model NB-200A chucks are assembled with adaptor for ASA B5.9 type A spindles.
4. Model NB-200A chucks are manufactured from high grade alloy steel. All sliding surfaces are hardened and ground for accurate actual running and long service repeatability.

V

3-jaw wedge type non through-hole power chuck (adapter excluded)

- High performance :
Similar high performance with N series.
- Chuck mounting screws :
Metric or UNC socket head cap screws are supplied for installing the chuck to the spindle.

UNIT : mm

VT&VIT

2-jaw and 4-jaw wedge type non through-hole power chuck (adapter excluded)

- Suitable for special applications :
Used to hold special shape work pieces, such as square bar or flanges which is not possible clamping by 3 jaw chuck.
- Interchangeable with V or VA series.
- Basic dimensions are the same as V type.
- High performance as V type.

UNIT : mm

VA

3-jaw wedge type non through-hole power chuck (adapter included)

1. High performance :
Similar high performance with N series.
2. Chuck mounting screws :
Metric or UNC socket head cap screws are supplied for installing the chuck to the spindle.
3. Alternative spindle adaptors :
ASA or DIN adaptors can be supplied as requested.

UNIT : mm

V(40"-79")

Large wedge type non through-hole power chuck (adapter excluded)

1. Chucking operations of very large components external or internal clamping.
2. Suitable for vertical lathe, due to the front protection of slide way.
3. Master jaw with manual radial setting function.

Soft jaw HC40-1 Hard jaw HJ40-1

UNIT : mm

DV/DN

Vertical and vertical horizontal stationary power chuck

1. Suitable for vertical milling and drilling operations.
2. With large through-hole, Vertical / horizontal power chucks does not only clamp the long workpiece but also the horizontal holding.

CR

Collet chuck for cylindrical center mount

1. Collet chucks with bayonet catch are mainly used for chucking bar work on NC / CNC lathes.
2. The bar can be fed in through the chuck.
3. Profiles can also be chucked with the appropriate collets.

UNIT : mm

MK

Super high speed through-hole compact rotary hydraulic cylinder

1. The compact hydraulic cylinder which is shorten the length about 30% and light weight can reduce the spindle loading while running in high speed.
2. Built-in check valve in safety auto lock and pressure relief valve in case of power failure occurs.
3. New model developed for rear locking installation.

CM.B

Hydraulic cylinder coolant collector

1. Hydraulic cylinders coolant collectors. Compact and light weight, they feature bore sizes up to 20% large than Conventional Cylinders. Precision finished piston bores and cool running rotary unions are included for years of trouble-free performance.
2. The proximity switches are extra option.

ML-CM.B

Extra large through-hole rotary hydraulic cylinder

1. Matching for large bore power chucks.
2. Special aluminum alloy steel body, light weight for reducing the spindle loading.
3. Within check valves to maintain the thrust force.
4. Extra large bore design, equipped with coolant collector and detective plate.
5. The proximity switches and mounting bolts are extra option.

MM

High speed and compact through-hole rotary hydraulic cylinder

1. Compact hydraulic cylinder design with light weight can reduce the spindle loading while running in high speed.
2. Built-in check valve in safety auto lock and pressure relief valve in case of power failure occur.
3. New model developed for rear installation.

MS

Non through-hole rotary hydraulic cylinder (valve included)

- Built-in safety check valves.

MH

Non through-hole rotary hydraulic cylinder

1. Compact, low inertia, light weight cylinder :
Manufactured by aluminium alloy, this cylinder is light weight design to reduce the loading of spindle.
2. High speed :
This balanced design cylinder is light weight, compact and maintains outstanding stability during high speed operation.
3. Long life :
High quality cylinder seals and high accuracy surface finish on components to ensure the long life of these cylinders.

T-NUTS

Suitable for power chuck

F52

High speed and light weight type strong finger chuck for aluminum wheel

1. All sliding surfaces are hardened and ground for accurate actual running and long service repeatability.
2. Mounting : Adaptor mounting to fit with DIN, ISO, BS, ASA, B5-9 type A spindles.

BL

3-jaw ball swing lock chuck

1. The chuck can attract the workpiece and hold it on.
The jaw operates in two stages :
Clamping pull back, so it can hold the workpiece exactly on the position in front of the chuck, and make it under the stabile situation.
2. The chuck can grasp the workpiece on both O.D. and I.D. clamping.
The chuck can switch between O.D. and I.D. clamping mode by a simple operation.
3. The chuck can grasp the part of the taper. The chuck can exactly grasp the black surface of the cast irons, which has draft.
So the discard process can be ignored on the chucking part of the workpiece. (It can grasp up to a 20 degree taper when using a clipper.)
4. The jaw can equalize on the O.D. clamping, so it can grasp the workpiece steady. (Jaw self-equalizing to max 5°)
5. Dustproof performance is excellent. It is differ from regular general purpose chuck. It is structurally dustproof. Especially there is a dustproof seal in the part of lock arm to prevent the dust.

DR

3-jaw draw down power chuck

Draw down power chuck feature of radial clamping will lead to almost no work piece uplifting displacement; for machining casting and forging part:

1. For the clamped work-piece is appressed to the surtace, chucks are suitable for heavy machining.
2. Chuck Actutors with cylindrical structure are durable and ensures high clamping repeatability.
3. Accurate self-centering and pull back features are adequate or precise length control machining requirements.

P165

Floating plate center chuck

- Suitable for easy one step cutting of thin holes, plate and outside diameter.

HN

3-jaw extra high speed through-hole power chuck(adapter included)

1. Possible 10,000 r.p.m. highest speed chuck.
2. Model HN chucks are assembled with adaptor for ASA B5.9 type A spindles.
3. Model HN chucks are manufactured from high grade alloy steel. All sliding surfaces are hardened and ground for accurate actual running and long service repeatability.
